Goat anti-Mouse IgG(H+L) ,
Cross absorbed against human

E16SPB1011

Catalog No.	Size
E16SPB1011-100	100μl
E16SPB1011-500	500μl
E16SPB1011-1000	1000μl

Description:

Affinity purified antibody isolated from pooled antiserum from goats hyperimmunized with purified mouse IgG was labeled with biotin. Biotinylation reagent incorporating an aminocaproyl spacer. This can reduce the steric hindrance in binding avidin to some biotinylated compounds. This antibody has been cross absorbed against human immunoglobulins.

Storage: store at 2-8°C

Formulation: aqueous buffer, 0.09%sodium azide

Application:

ELISA: 1:2000-1:4000

Immunoblotting: 1:500-1:2000

Immunohistochemistry: 1:50

Optimal dilutions should be determined by each laboratory for each application.
