Description: Human HGF/Hepatocyte growth factor ELISA Kit is a ready-to-use microwell, strip plate ELISA (enzyme-linked immunosorbent assay) Kit designed for the quantitative measurement of HGF in biological samples. Our rigorously validated, ready-to-go Human HGF/Hepatocyte growth factor ELISA Kit use a simple protocol that easily integrates into your current processes, allowing you to rapidly and accurately detect HGF in your samples. Appropriate sample types may include Cell Culture Supernates, Serum, Platelet-poor EDTA Plasma, Platelet-poor Heparin Plasma, Urine. Precision Intra-Assay Precision (Precision within an assay): Three samples of known concentration were tested several times on one plate to assess intra-assay precision. Inter-Assay Precision (Precision between assays): Three samples of known concentration were tested in several separate assays to assess inter-assay precision. Assays were performed by at least two technicians using two lots of components.
