Human Proinsulin/Proinsulin ELISA Kit

E45K00179

Catalog Number:E45K00179

Species Reactivity: Human

Storage: Store at +4°C. Please refer to protocols.

Cite ID#:EN5520630

Type: Human ELISA Kits

Research Field: Signal Transduction

Description: Human Proinsulin/Proinsulin ELISA Kit is a ready-to-use microwell, strip plate ELISA (enzyme-linked immunosorbent assay) Kit designed for the quantitative measurement of Proinsulin in biological samples. Our rigorously validated, ready-to-go Human Proinsulin/Proinsulin ELISA Kit use a simple protocol that easily integrates into your current processes, allowing you to rapidly and accurately detect Proinsulin in your samples. Appropriate sample types may include Cell Culture Supernates, Serum, Platelet-poor EDTA Plasma, Platelet-poor Heparin Plasma, Urine. Precision Intra-Assay Precision (Precision within an assay): Three samples of known concentration were tested several times on one plate to assess intra-assay precision. Inter-Assay Precision (Precision between assays): Three samples of known concentration were tested in several separate assays to assess inter-assay precision. Assays were performed by at least two technicians using two lots of components.

Assay type: Sandwich

Detection principle: Spectrophotometrical

Sample type: This immunoassay kit allows for the in vitro quantitative determination in Serum, plasma, tissue homogenates, cell culture supernates and other biological fluids.

Sensitivity:0.31pmol/mL

Assay range:0.625-40pmol/mL

Kit components: Assay Plate, Standard, Sample Diluent, Assay Diluent A&B, Detection Reagent A&B, Wash Buffer, Substrate, Stop Solution.

Other reagents required: Deionized or distilled water

Gene Name: Proinsulin

Function: Proinsulin is the prohormone precursor to insulin made in the beta cells of the islets of Langerhans, specialized

For Research Use Only

regions of the pancreas. In humans, proinsulin is encoded by the INS gene.

Form:ELISA Kits
