Colitis-inducing agent TNBS, 5% W/V

E68C006-1

Catalog Number:E68C006-1

Shipping&Stability:-20℃ for one year.

Background: Trinitrobenzenesulfonic acid (TNBS) aqueous solution is a widely used animal model inducer for inflammatory bowel disease (IBD). It establishes ulcerative colitis models in rodents (rats/mice), accurately replicating human IBD pathological features. This product is strictly for research purposes in molecular biology and pharmacology, and is prohibited for human use.
